

Contracting authority:

Continental Automotive Czech Republic s.r.o.
Hradecká 1092, 506 01 Jičín – Valdické Předměstí
IČ: 620 24 922

In Prague, on 23 June 2017

Subject: Additional information regarding the tender documentation no. 2 – Answer to inquiries

In accordance with section 2 of the tender documentation for the delivery contract entitled “**Pull shear testing**” (the notice of the announcement of the tender for the contract within OPEIC published at the contracting authority’s profile at website: https://www.profilzadavatele.cz/profil-zadavatele/continental-automotive-czech-republic-s-r-o_921/univerzalni-zarizeni-na-mechanicke-zkousky-pull-shear-testing_18342/ on 29 May 2017), we provide you with additional information regarding the tender documentation based on questions of the bidder, following the extension of deadline for the submission of offers, as notified by the contracting authority in the context of additional information to the tender documentation no. 1.

Question no. 2:

How will the offers, submitted prior to the change in the technical specifications and therefore no longer meet the requirements of the tender procedure, be considered?

Answer no. 2:

If the tenderer has submitted or sent an offer to the contracting authority before the additional information to the tender documentation no. 1 has been published, he/she may submit a new offer in accordance with the new requirements of the technical specification of the subject of the contract, which are listed in the updated appendix no. 4 of the tender documentation.

If the tenderer submits a new offer personally, the original offer will be returned to his/her hands. If the tenderer submits a new offer via post or courier service, the offer with a later delivery date will be opened during the envelope opening and the original offer will be sent back to the tenderer by post.

If the tenderer submits a new offer, it must be complete, i.e. it must contain all the documents required in the tender documentation (to submit only a new technical offer page is not possible).

If the tenderer has submitted or sent an offer to the contracting authority before the additional information to the tender documentation no.1 has been published and does not make use of the opportunity to submit a new offer, the original offer will be opened during the envelope opening and evaluated.

Best regards
